NOTICE explains practices not related to physical injury. No safety alert symbol appears with this signal word. Note: Provides additional information to clarify or simplify a  
procedure. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 8 of 80 ... Page 9 For operation, always use a power source as indicated in the instructions. Always unplug the cable by gripping the plug, not the cable. Never try to repair. All repair work should be done by a qualified cmotion Service  
Center. Never remove or deactivate any safety equipment (incl. warning stickers or paintmarked screws). Always follow the valid instructions and system requirements for all equipment involved. Note: The cPRO hand unit is solely and exclusively for use on professional camera setups. 3. Scope of delivery and... 4. Introduction The cPRO hand unit is  
the wireless hand-held control unit of the cPRO lens control system with an integrated red-coded cmotion radio module. With its user friendly and intuitive interface the cPRO hand unit is lightweight and sets new standards in both design and ergonomics. LBUS interface using any LBUS to LBUS cable. 4.2. CAM interface The cPRO hand unit does not  
have a CAM interface itself. But, the CAM interface on the cPRO motor / cPRO camin is also a fully functional LBUS connector. As such, it allows multiple lens motors and control devices to communicate with each other through K2.0015760 Cable... button Joystick indicator display Back button All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 13 of 80 ... All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 14 of 80 ... 5.2.1.2. Panic button The cPRO panic button is a unique feature of the  
cPRO hand unit. It allows you to overwrite the mechanical hard stops without adjusting the predefined focus range. E.g. when shooting the slate outside of the predefined focus range, or the actor misses their mark. 5.2.2.1. Pre-marked iris strips In order to save time marking your iris strips for each lens, the cPRO hand unit offers three pre-marked  
strips. Each strip is engraved with a scale from close or 22 to one of three wide open iris values. For more information refer to section "6.2.3.2.2.2. Pre-marked strips"... The status LED for the joystick is a separate LED above the position indicator display. This gives you direct feedback of the status of the joystick axis. All content © 2018, cmotion  
GmbH. All specifications are subject to change without further notice. page 17 of 80... Thumb wheel Thumb wheel The thumb wheel is a unique control interface of the cPRO hand unit with a relative position encoder. It allows you to navigate through all the menu pages comfortably even when wearing gloves. It is even possible to assign the thumb  
wheel as a 4th axis controller (available with Software Release Package v2.0). User button 2 (UB2) User button 3 (UB3) All user buttons (UB1/UB2/UB3) in the center of the cPRO hand unit can be assigned individually. Once assigned to a user function, each assigned button will illuminate individually unless keypad brightness is set at 0. 5.2.5.3. Back  
button Back button (BB1) The back button is located on the hand grip of the cPRO hand unit, underneath the LBUS connector. It is not illuminated but can be assigned individually to any user function. 5.2.5.4. Menu buttons... 5.2.5.6. System status LED System status LED The system status LED indicates the status of the cPRO hand unit. All content ©

All specifications are subject to change without further notice. page 33 of 80 ... The RF menu  
allows you to turn the wireless radio on or off. Note: If the cPRO hand unit is connected hard-wired to the cPRO motor or cPRO camin via the daisy-chain, the system will detect an LBUS loop and will turn the radio off automatically (LBUS loop detection). NOTICE It may not be legal to operate the cPRO hand unit in a country/region other than the  
country/region selected in the region menu. Select ROW (Rest of world) or use the device in hard-wired mode if you are unsure of the correct region setting. 6.2.3.1.3.1. Auto activate The auto activate function can be turned on or off. If turned on, the cPRO hand unit's illumination will turn off if the light sensor is exposed to a light source. If it gets  
darker, the illumination will switch on to the pre-defined brightness settings again (e.g. if you are shooting outside and you have to enter a dark building). The letter "D" for Display will illuminate each time you press the locked touch screen. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 37 of  
80... 6.2.3.2. CONTROLS The controls menu contains all settings related to the main controls: knob, slider and joystick. Knob Slider Joystick All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 38 of 80 ... Choose the right pre-marked focus ring to match the close focus value of your lens. Enter  
the pre-marked rings menu and select the appropriate marker ring from the list. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 39 of 80 ... Note: Before pre-marked iris strips can be used, a lens file needs to be created using the cPRO hand unit's internal 'create lens' feature or a cworld. All  
content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 40 of 80... Min, Mid or Max. At Min, the joystick needs more pressure to react. At Max, the joystick will respond to a lighter touch. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 41 of 80... It is  
also possible to upload archive lens files via the USB port (available with Software Release Package v2.0). All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 42 of 80 ... Note: If there is no lens loaded on the hand unit, advanced cPRO features will be disabled and the main screen will only display a  
percentage of the motors calibrated range. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 43 of 80... 6.2.3.3.3. Create The Create menu allows you to create a lens file using the cPRO hand unit's internal lens wizard. To create a new lens file, follow the procedure below. Note: While creating a  
new lens file, it is possible to exit the lens wizard using the back function (MB1) or the HOME button at any stage without losing recently entered data. UB3 allows you to select a previous set character. Once it is highlighted in blue, you can change it using the thumb wheel or touch screen or delete it by pressing UB2. All content © 2018, cmotion  
GmbH. All specifications are subject to change without further notice. page 45 of 80... Confirm your selection by pressing "next" (MB3) or swipe left on the touch screen. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 46 of 80... As an alternative, you can also tap the touch screen to confirm  
your selection or press the back button (BB1). All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 47 of 80... Page 48 Lines can either be added between values or added separately after all the values have been created. All content © 2018, cmotion GmbH. All specifications are subject to change  
without further notice. page 48 of 80 ... However, to achieve the best matching lens data, it is recommended to input and assign as many values as possible using this procedure. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 49 of 80... If you move the lens from the last set value in one  
direction, the lens wizard will predict the next value. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 50 of 80... Page 51 Lines can either be added between values or added separately after all the values have been created. All content © 2018, cmotion GmbH. All specifications are subject to  
change without further notice. page 51 of 80 ... As soon as at least one value is set per scale, the "save" icon will illuminate white. Press MB2 to save the lens file to the internal memory of the cPRO hand unit. With the present firmware release, up to 30 lens files can be saved. 6.2.3.3.4. Edit The edit menu allows you to edit existing lens files on the  
cPRO hand unit using the lens wizard. Note: If you are editing a lens file and you leave the lens wizard by pressing the back function (MB1) or the HOME button, changes will not be saved. Edit" on page 53 in this manual. 6.2.3.3.5. Delete The delete menu allows you to delete an individual lens file from the cPRO hand unit's internal memory. Once  
selected from the dynamic list, detailed lens information about the lens will be displayed on the following page. For the correct circle of confusion value for your camera, please refer to the camera manual or contact the camera manufacturer. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 55 of  
80... Disconnect the plug if the device is not used for a longer period of time. IEC 60417-6056 (2011-05) for other moving parts All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 56 of 80... Note: The direction is defined from the operators point of view, from behind the camera. All content © 2018,  
cmotion GmbH. All specifications are subject to change without further notice. page 57 of 80... LBUS connected cforce motors will be turned off (e.g. if the camera angle is critical because of camera reflection in the picture). All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 58 of 80... Note: The  
limits icon in the rangefinder main screen will turn green if a rangefinder limit other than limit max = inf and limit min = 0 is set, otherwise the icon illuminates white. All content © 2018, cmotion GmbH. All specifications are subject to change without further notice. page 59 of 80... 61 in this manual) Note: In order to use autofocus with a cPRO hand  
unit, a lens file needs to be loaded, a lens motor needs to be connected, engaged with the lens and assigned to focus. (For further information on how to create lens data, please refer to section "6.2.3.3. The buttons menu allows you to assign user functions to any assignable user button on the cPRO hand unit. Once a user function is assigned to a  
button, the button will illuminate and the buttons assignment will be displayed in the buttons main screens. If the button is assigned to no function (off) the corresponding user button will not be illuminated. Lock joystick digitally locks and unlocks the joystick Lock thumb wheel digitally locks and unlocks the thumb wheel All content © 2018, cmotion  
GmbH. All specifications are subject to change without further notice. page 62 of 80 ... Radio module ID / firmware version Revision number Built date The cPRO hand unit ABOUT menu shows you all relevant data about your cPRO hand unit. Note: Please have this data available, if contacting the cmotion support team with any technical enquiries.  
LBUS device needs to be inserted in the USB slot on the back side of the cPRO hand unit. The USB drive will be recognized and mounted automatically. Page 65 LBUS device will restart automatically. NOTICE Please ensure the battery of the cPRO hand unit is completely charged before starting any update! Do not remove the battery or the USB  
drive from the cPRO hand unit while the update is in progress! NOTICE... The factory reset menu allows you to reset the cPRO hand unit and all connected LBUS devices to manufacturer settings. Please select all if you want to reset all connected LBUS devices and the cPRO hand unit. Select cPRO hand unit if you want to reset the cPRO hand unit  
only. Select LBUS devices and then one device from the dynamic LBUS device list if you want to reset a specific LBUS device only. Note: please double check if the region settings are set to the region you are located in. \* cPRO hand unit: double press the HOME button to enter menu; go to MAIN / RADIO / Region to change the region settings. The  
region will be set on the cPRO motor automatically. Note: If multiple hand units are used, please set all cPRO hand units you want to connect to the network to the same radio channel as the cPRO motor. Once a cPRO hand unit is set to the same radio channel like the cPRO motor, the device will connect automatically. Up to 3 cPRO hand units can be  
connected to a cPRO motor at a time (available with Software Release Package v2.0 / license required for each hand unit). Note: please double check if the region settings are set to the region you are located in. \* cPRO hand unit: double press the HOME button to enter menu; go to MAIN / RADIO / Region to change the region settings. The region  
will be set on the cPRO camin automatically. Note: If multiple hand units are used, please set all cPRO hand units you want to connect to the network to the same radio channel as the cPRO camin. Once a cPRO hand unit is set to the same radio channel like the cPRO camin, the device will connect automatically. Up to 3 cPRO hand units can be connected  
to a cPRO camin at a time (available with Software Release Package v2.0 / license required for each hand unit). 8. Compatibility The cPRO hand unit is directly compatible with the following cmotion / ARRI products: cPRO motor / cPRO camin ■ cforce mini lens motor ■ cforce plus lens motor ■ cdistance ■ cfinder III ■ steady zoom / pan-bar zoom  
■ ... Only the originally supplied battery should be used with the cPRO hand unit. Radio system The cPRO hand unit contains a radio unit that enables wireless lens control with a red coded radio module. A red ring at the base of the antenna mount on both the cPRO motor and cPRO camin identifies this. COEK G50 Schnellbefestigung ASM Quick Fa  
COEK G92 Typenschild Nameplate / T Note: cmotion red radio and ARRI white radio are not compatible. This means the cPRO ISO 14583 TX - M3 - 30mm Flachkopfschr hand unit will not communicate with an ARRI white enabled camera or UMC. However, ... ■ NOTICE The cPRO hand unit basic set does not include an LBUS or CAM cable. LBUS  
cables are available in various lengths and need to be ordered separately. Antenna part numbers Radial/Larsen K2.0002007 Dipole / Reverse SMA...
